PROFESSIONAL PROFILE

I have spent over 6 years designing B2B digital products. My favourite spot is the middle ground between business and development: I turn business ideas into product definition and strategy, and into things that can actually be built. I have worked across every stage, from research to design systems, and guided other designers when a project called for it. I design with one fixed idea: people first, both the end user and the teams that define and build the product.

SKILLS

Product design: UX/UI Design, Design Systems, Prototyping, Wireframing, Information Architecture, Interaction Design, Accessibility (WCAG)

Research: User interviews, Shadowing, Usability testing, Journey mapping, Optimal Workshop, Hotjar

Design tools: Figma, FigJam, Framer, Miro, Storybook, Zeroheight

Data and management: Google Analytics, Looker Studio, Jira, Notion

AI in design workflows: Claude Code, Claude Cowork, Antigravity

Development: HTML, CSS, JavaScript, Java

Languages: Spanish (native), English (C1), Italian (B1)

WORK EXPERIENCE

Product Designer

January 2020 - Present

Icarus Holistic Services, Madrid, Spain

- Redesigned one of the tools in Tinsa's product suite (property valuation), used daily by around 2,000 valuers, and helped improve other tools in the suite.
- Also worked on B2C products: helped create new products and improve the sales funnel.
- Built the foundations of a design system for the design and development teams.
- Led the full research process on the Vega project (shadowing, interviews and usability tests), defined the product strategy and coordinated a visual designer.
- Act as the bridge between business and development: I turn business ideas into product definition and requirements that engineering can build.

Junior Developer

March 2019 - May 2019

The Good Website, London, United Kingdom

- Researched and compared work management tools for the team.
- Migrated the team to the chosen tool without disrupting their work.

EDUCATION

Master's in Advanced Product Design

2024

M.Marcel School, Madrid

Master's in Graphic Design

2022

LABASAD, Madrid

UX/UI Design Bootcamp

2019
